Knowledge Type 7

An Event is followed by a Property:

```
E [instance_of: A, rel₁: X₁,..., relₙ: Xₘ]
followed by
P [instance_of: PROP, is_trait_of: Y₁,..., is_trait_of: Yₙ]
implies
X=Y
```

where, $X \in \bigcup_{i=1}^{m} \{X_i\}$, and $Y \in \bigcup_{j=1}^{n} \{Y_j\}$

Intuitively, a statement of the above category means that if the execution of an event (E) is followed by a property (P) then an entity that participates in E is also associated with P.

Examples:

1. Sam broke both his ankles and he's walking with crutches. But a month or so from now they should be better. What should be better?
   Correct Answer: The ankles.

   Knowledge Instance:
   E1 [instance_of: break, patient: X [instance_of: entity]]
   followed by
   P [instance_of: better, is_trait_of: Y [instance_of: entity]]
   implies
   X=Y
